This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ruthenium and osmium complexes in C–C bond-forming reactions by borrowing hydrogen catalysis

Giorgio Chelucci^{a,*}

^a*Dipartimento di Agraria, Università di Sassari, viale Italia 39, I-07100 Sassari, Italy.*

*Corresponding author. E-mail: chelucci@uniss.it

Keywords: ruthenium complexes, osmium complexes, borrowing hydrogen catalysis, hydrogen autotransfer catalysis, alcohols, aldehydes, catalysis.

Contents

1. Introduction

2. α -Alkylation of ketones with alcohols

- 2.1. α -Alkylation of ketones with alcohols to afford ketones
- 2.2. α -Alkylation of ketones with alcohols to afford alcohols
- 2.3. α -Alkylation of ketones with alcohols to afford chiral alcohols

3. β -Alkylation of alcohols with alcohols

- 3.1. β -Alkylation of alcohols with alcohols to afford alcohols
- 3.2. β -Alkylation of alcohols with alcohols to afford ketones

4. β -Alkylation of alcohols with aldehydes to afford alcohols or ketones

5. Alkylation of nitriles with alcohols

6. Alkylation of nitro derivatives with alcohols

7. Alkylation of amides with alcohols

8. Alkylation of α,α -difunctionalized methylene active compounds with alcohols

- 8.1. Alkylation of β -ketonitriles with alcohols
- 8.2. Alkylation of nitrile derivatives with alcohols by Ru-supported catalysts
- 8.3. Alkylation of malonic acid monoester with alcohols
- 8.4. Alkylation of miscellaneous α,α -difunctionalized methylene active compounds with alcohols

9. Coupling of α,β -unsaturated aldehydes with primary alcohols

10. Synthesis of α,β -unsaturated aldehydes from primary alcohols

11. Indirect Wittig-type reaction
