Photoactive rhenium carbonyl complexes of N,N,S-donor ligands: Contrast in binding modes based on flexibility of ligand frames and nature of ancillary ligands

Indranil Chakraborty, Jennyfer Tena, Pradip K. Mascharak

PII: S0020-1693(17)30951-9
DOI: <http://dx.doi.org/10.1016/j.ica.2017.08.015>
Reference: ICA 17809

To appear in: *Inorganica Chimica Acta*

Received Date: 15 June 2017
Revised Date: 4 August 2017
Accepted Date: 5 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Photoactive rhenium carbonyl complexes of N,N,S-donor ligands:
Contrast in binding modes based on flexibility of ligand frames
and nature of ancillary ligands**

Indranil Chakraborty, Jennyfer Tena, and Pradip K. Mascharak*

*Contribution from the Department of Chemistry and Biochemistry, University of California
Santa Cruz, CA 95064*
