Tuning the structure of aminoferrocene-based anticancer prodrugs to prevent their aggregation in aqueous solution

Steffen Daum, Svetlana Babiy, Helen Konovalova, Walter Hofer, Alexander Shtemenko, Natalia Shtemenko, Christina Janko, Christoph Alexiou, Andriy Mokhir

PII: S0162-0134(17)30193-9
DOI: doi: [10.1016/j.jinorgbio.2017.08.038](https://doi.org/10.1016/j.jinorgbio.2017.08.038)
Reference: JIB 10332

To appear in: *Journal of Inorganic Biochemistry*

Received date: 28 March 2017
Revised date: 24 August 2017
Accepted date: 30 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tuning the Structure of Aminoferrocene-Based Anticancer Prodrugs to Prevent Their Aggregation in Aqueous Solution
