Ferrocene-steroid conjugates: Synthesis, structure and biological activity

Xiomara Narváez-Pita, Arnold L. Rheingold, Enrique Meléndez

PII: S0022-328X(17)30399-6

DOI: [10.1016/j.jorganchem.2017.06.004](https://doi.org/10.1016/j.jorganchem.2017.06.004)

Reference: JOM 19991

To appear in: *Journal of Organometallic Chemistry*

Received Date: 26 April 2017

Revised Date: 1 June 2017

Accepted Date: 5 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

Ferrocene-steroid conjugates exhibit enhanced antiproliferative activity on both, HT-29 and MCF-7 cancer cell lines and their activity may not be correlated to ER α .
