Title: A new method to produce cellulose nanofibrils from microalgae and the measurement of their mechanical strength

Authors: Hyun-Ro Lee, KyuHan Kim, Sung Cik Mun, Yong Keun Chang, Siyoung Q. Choi

PII: S0144-8617(17)31146-3
DOI: <https://doi.org/10.1016/j.carbpol.2017.09.104>
Reference: CARP 12849

To appear in:

Received date: 18-7-2017
Revised date: 29-8-2017
Accepted date: 30-9-2017

Please cite this article as: Lee, Hyun-Ro., Kim, KyuHan., Mun, Sung Cik., Chang, Yong Keun., & Choi, Siyoung Q., A new method to produce cellulose nanofibrils from microalgae and the measurement of their mechanical strength. *Carbohydrate Polymers* <https://doi.org/10.1016/j.carbpol.2017.09.104>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A new method to produce cellulose nanofibrils from microalgae and the measurement of their mechanical strength

Hyun-Ro Lee, KyuHan Kim, Sung Cik Mun, Yong Keun Chang, Siyoung Q. Choi*
