This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Synthesis and characterization of cassava starch with maleic acid derivatives by etherification reaction

Samuel H. Clasen^{a*}, Carmen M. O. Müller^b, Alexandre L. Parize^c, Alfredo T. N. Pires^d

Highlights

- Etherification reaction of cassava starch.
- Modification of the starch fobicity.
- Determination of the degree of substitution from ¹H-NMR analyzes.
- Potential of modified starch for use in bioactive packaging.
