Title: Polyphenol-Induced Cellulose Nanofibrils Anchored Graphene Oxide as Nanohybrids for Strong yet Tough Soy Protein Nanocomposites

Authors: Zhong Wang, Haijiao Kang, Shujun Zhao, Wei Zhang, Shifeng Zhang, Jianzhang Li

PII: S0144-8617(17)31144-X
DOI: <https://doi.org/10.1016/j.carbpol.2017.09.102>
Reference: CARP 12847

To appear in:

Received date: 11-7-2017
Revised date: 11-9-2017
Accepted date: 30-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Polyphenol-Induced Cellulose Nanofibrils Anchored Graphene Oxide as Nanohybrids for Strong yet Tough Soy Protein Nanocomposites
