## Highlights

- Protamex-hydrolyzed rice bran protein at 1 h (PRBPH-1) was released.
- PRBPH-1 reduced significantly the short- and long-term retrogradation of gelatinized rice starch.
- The relative crystallinity of retrograded RS declined with the addition of PRBPH-1 in DSC and XRD.
- Formation of intra- and inter-particle hydrogen bonds and recrystallization were weakened by PRBPH-1.

## Abstract

The retrogradation of gelatinized rice starch (GRS) during the shelf life of a product is
