Title: Hydrogen bonds and twist in cellulose microfibrils

Author: Sridhar Kumar Kannam Daniel P. Oehme Monika S. Doblin Michael J. Gidley Antony Bacic Matthew T. Downton

PII: S0144-8617(17)30859-7

DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2017.07.083>

Reference: CARP 12600

To appear in:

Received date: 16-2-2017

Revised date: 23-6-2017

Accepted date: 29-7-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights for “Hydrogen bonds and twist in cellulose microfibrils”

- The role of intra chain hydrogen bonds on the twist of cellulose studied
- Multiple methods are used to explore the role of particular hydrogen bonds
- No in-chain hydrogen bond is found to play a definitive role in the twist
