Title: Production of cellulose nanofibers using phenolic enhanced surface oxidation

Authors: Iman Beheshti Tabar, Ximing Zhang, Jeffrey P. Youngblood, Nathan S. Mosier

PII: S0144-8617(17)30695-1
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2017.06.058>
Reference: CARP 12446

To appear in:

Received date: 31-3-2017
Revised date: 13-6-2017
Accepted date: 15-6-2017

Please cite this article as: Tabar, Iman Beheshti., Zhang, Ximing., Youngblood, Jeffrey P., & Mosier, Nathan S., Production of cellulose nanofibers using phenolic enhanced surface oxidation. *Carbohydrate Polymers* <http://dx.doi.org/10.1016/j.carbpol.2017.06.058>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Production of cellulose nanofibers using phenolic enhanced surface oxidation
