Title: Evolution of plant cell wall: Arabinogalactan-proteins from three moss genera show structural differences compared to seed plants

Authors: Desirée Bartels, Alexander Baumann, Malte Maeder, Thomas Geske, Esther Marie Heise, Klaus von Schwartzberg, Birgit Classen

PII: S0144-8617(17)30043-7
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2017.01.043>
Reference: CARP 11921

To appear in:

Received date: 28-11-2016
Revised date: 6-1-2017
Accepted date: 10-1-2017

Please cite this article as: Bartels, Desirée., Baumann, Alexander., Maeder, Malte., Geske, Thomas., Heise, Esther Marie., von Schwartzberg, Klaus., & Classen, Birgit., Evolution of plant cell wall: Arabinogalactan-proteins from three moss genera show structural differences compared to seed plants. *Carbohydrate Polymers* <http://dx.doi.org/10.1016/j.carbpol.2017.01.043>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evolution of plant cell wall: Arabinogalactan-proteins from three moss genera show structural differences compared to seed plants
