Title: Amylopectin small chain glucans form structure fingerprint that determines botanical origin of starch

Author: Sarita Jaiswal Ravindra N. Chibbar

PII: S0144-8617(16)31334-0
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2016.11.059>
Reference: CARP 11771

To appear in:

Received date: 12-9-2016
Revised date: 16-11-2016
Accepted date: 20-11-2016

Please cite this article as: Jaiswal, Sarita., & Chibbar, Ravindra N., Amylopectin small chain glucans form structure fingerprint that determines botanical origin of starch. *Carbohydrate Polymers* <http://dx.doi.org/10.1016/j.carbpol.2016.11.059>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Amylopectin small chain glucans form structure fingerprint that determines botanical origin of starch
