Title: Glass transition of anhydrous starch by fast scanning calorimetry

Authors: Xavier Monnier, Jean-Eudes Maigret, Denis Lourdin, Allisson Saiter

PII: S0144-8617(17)30559-3
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2017.05.042>
Reference: CARP 12328

To appear in:

Received date: 17-3-2017
Revised date: 3-5-2017
Accepted date: 14-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Glass transition of anhydrous starch by fast scanning calorimetry

Highlights

The glass transition of anhydrous starch can be measured by Fast Scanning Calorimetry

The value measured at 312°C is in agreement with extrapolated value of 316°C
