Title: Applications of bacterial cellulose as precursor of carbon and composites with metal oxide, metal sulfide and metal nanoparticles: A review of recent advances

Author: M.L. Foresti A. Vazquez B. Boury

PII: S0144-8617(16)31062-1
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2016.09.008>
Reference: CARP 11535

To appear in:

Received date: 22-6-2016
Revised date: 1-9-2016
Accepted date: 3-9-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Applications of bacterial cellulose as precursor of carbon and
composites with metal oxide, metal sulfide and metal nanoparticles:

A review of recent advances.
