Title: Orange waste: A valuable carbohydrate source for the development of beads with enhanced adsorption properties for cationic dyes

Author: Emanuele F. Lessa Matheus S. Gularte Emanuel S. Garcia André R. Fajardo

PII: S0144-8617(16)31179-1
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2016.10.019>
Reference: CARP 11639

To appear in:

Received date: 19-8-2016
Revised date: 28-9-2016
Accepted date: 9-10-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Orange waste: A valuable carbohydrate source for the development of beads
with enhanced adsorption properties for cationic dyes**

Emanuele F. Lessa, Matheus S. Gularte, Emanuel S. Garcia and André R. Fajardo*
