A comparative study on the activity of fungal lytic polysaccharide monooxygenases for the depolymerization of cellulose in soybean spent flakes

Brian C. Pierce, Jane Wittrup Agger, Zhenghong Zhang, Jesper Wichmann, Anne S. Meyer

PII: S0008-6215(17)30294-X

DOI: [10.1016/j.carres.2017.07.004](https://doi.org/10.1016/j.carres.2017.07.004)

Reference: CAR 7418

To appear in: *Carbohydrate Research*

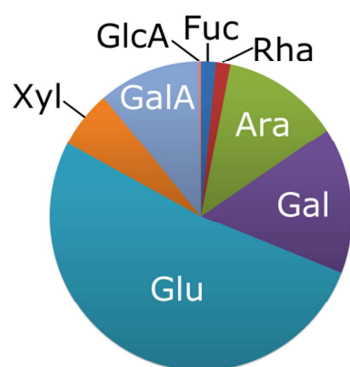

Received Date: 2 May 2017

Revised Date: 21 June 2017

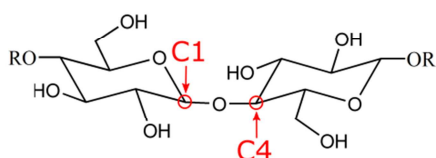

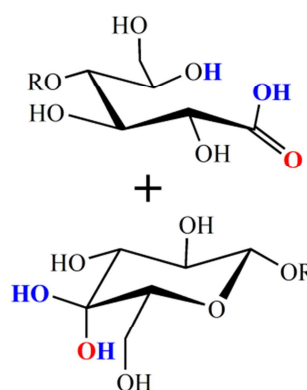

Accepted Date: 17 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pretreated Soybean Polysaccharides

24 LPMOs screened
(8 fungal organisms)

**7 Active**
