Improved quantification of monosaccharides in complex lignocellulosic biomass matrices: A gas chromatography-mass spectrometry based approach

Thomas Zweckmair, Sonja Schiehser, Thomas Rosenau, Antje Potthast

PII: S0008-6215(17)30177-5

DOI: [10.1016/j.carres.2017.04.011](https://doi.org/10.1016/j.carres.2017.04.011)

Reference: CAR 7361

To appear in: *Carbohydrate Research*

Received Date: 2 March 2017

Revised Date: 11 April 2017

Accepted Date: 11 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highly matrix-loaded
biorefinery
effluent**

**Baseline separation of
all peak pairs**

**EO-TFA: substantially improved
recovery and precision**
