

Accepted Manuscript

Enhancing activity and selectivity in a series of pyrrol-1-yl-1-hydroxypyrazole-based aldose reductase inhibitors: The case of trifluoroacetylation

Nikolaos Papastavrou, Maria Chatzopoulou, Jana Ballekova, Mario Cappiello, Roberta Moschini, Francesco Balestri, Alexandros Patsilinakos, Rino Ragno, Milan Stefek, Ioannis Nicolaou

PII: S0223-5234(17)30126-5

DOI: [10.1016/j.ejmech.2017.02.053](https://doi.org/10.1016/j.ejmech.2017.02.053)

Reference: EJMECH 9249

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 5 December 2016

Revised Date: 25 January 2017

Accepted Date: 20 February 2017

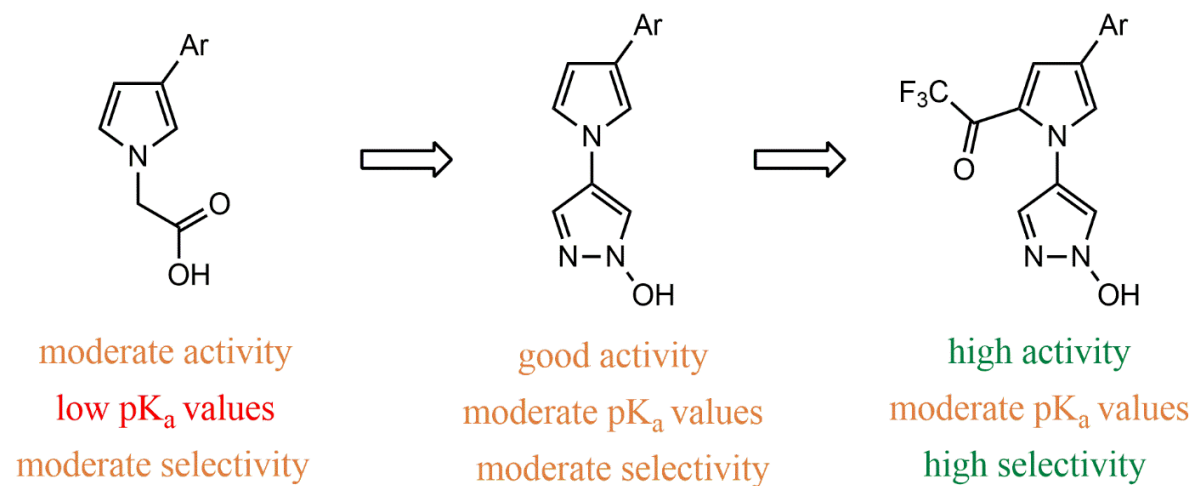

Please cite this article as: N. Papastavrou, M. Chatzopoulou, J. Ballekova, M. Cappiello, R. Moschini, F. Balestri, A. Patsilinakos, R. Ragno, M. Stefek, I. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical abstract

Optimization of pyrrole-based Aldose Reductase Inhibitors (ARIs)
