This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

Recent Advances of Pyrazole-containing Derivatives as Anti-tubercular Agents

Zhi Xu^a, Chuan Gao^b, Qing-Cheng Ren^b, Xu-Feng Song^d, Lian-Shun Feng^b, Zao-Sheng Lv^{*a},

^aKey Laboratory of Hubei Province for Coal Conversion and New Carbon Materials, Wuhan University of Science and Technology, Hubei, P R China;

^bWuXi AppTec (Wuhan), Hubei, P R China;

^cBeijing University of Technology, Beijing, P R China

This review aims to outline the recent advances in the discovery of pyrazole-containing derivatives as anti-TB agents and the SAR of these heterocycles.
