Zhang, Morpholine or methylpiperazine and salicylaldimine based heteroleptic square planar platinum (II) complexes: *In vitro* anticancer study and growth retardation effect on *E. coli*, *European Journal of Medicinal Chemistry* (2017), doi: 10.1016/j.ejmech.2017.03.014.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Morpholine and methylpiperazine drug units were incorporated as co-ligand in a series of structurally related mono- and di-metallic square planar Pt(II) complexes. Detailed cytotoxicity assay and *E. coli* growth retardation study was conducted for these complexes.
