Developing potential agents against atherosclerosis: Design, synthesis and pharmacological evaluation of novel dual inhibitors of oxidative stress and Squalene Synthase activity

Maria G. Katselou, Alexios N. Matralis, Angeliki P. Kourounakis

PII: S0223-5234(17)30489-0

DOI: [10.1016/j.ejmech.2017.06.042](https://doi.org/10.1016/j.ejmech.2017.06.042)

Reference: EJMECH 9537

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 3 November 2016

Revised Date: 13 March 2017

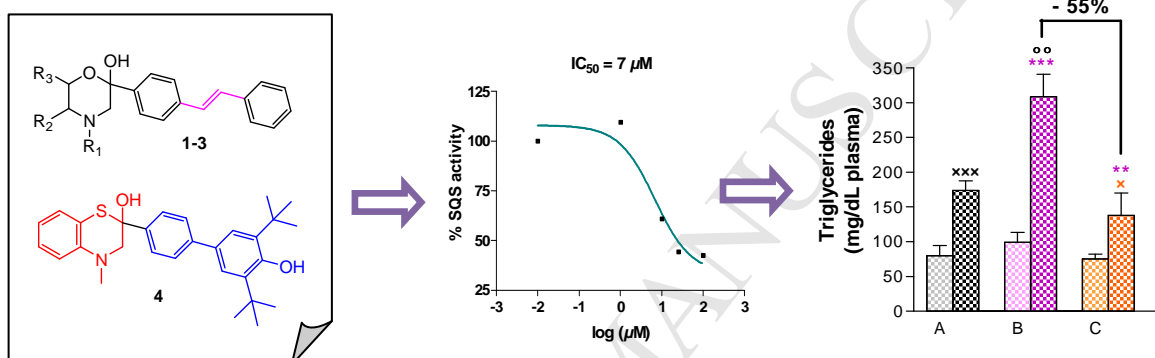

Accepted Date: 23 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

Developing Potential Agents against Atherosclerosis: Design, Synthesis and Pharmacological Evaluation of Novel Dual Inhibitors of Oxidative Stress and Squalene Synthase Activity
