Design, synthesis and evaluation of 4-Aminoquinoline-purine hybrids as potential antiplasmodial agents

P. Linga Reddy, Shabana I. Khan, Prija Ponnann, Mohit Tripathi, Diwan S. Rawat

PII: S0223-5234(16)31005-4

DOI: [10.1016/j.ejmech.2016.11.057](https://doi.org/10.1016/j.ejmech.2016.11.057)

Reference: EJMECH 9090

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 30 September 2016

Revised Date: 28 November 2016

Accepted Date: 29 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Design, Synthesis and Evaluation of 4-Aminoquinoline-Purine Hybrids as Potential Antiplasmodial Agents

P. Linga Reddy,¹ Shabana I. Khan,² Prija Ponnann,¹ Mohit Tripathi,¹ and Diwan S. Rawat^{1*}
