UV-Curable Antibacterial Ionic Polysilsesquioxanes: Structure-Property Relationships Investigating the Effect of Various Cations and Anions

Albert S. Lee, Jin Hong Lee, Seung-Sock Choi, Kie Yong Cho, Seunggun Yu, Chong Min Koo, Kyung-Youl Baek, Seung Sang Hwang

PII: S0014-3057(17)30182-9

DOI: <http://dx.doi.org/10.1016/j.eurpolymj.2017.08.005>

Reference: EPJ 7998

To appear in: *European Polymer Journal*

Received Date: 31 January 2017

Revised Date: 16 June 2017

Accepted Date: 3 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

UV-Curable Antibacterial Ionic Polysilsesquioxanes: Structure-Property Relationships Investigating the Effect of Various Cations and Anions
