Rapidly self-recoverable and fatigue-resistant hydrogels toughened by chemical crosslinking and hydrophobic association

Xin Liu, Li Jie Duan, Guang Hui Gao

PII: S0014-3057(16)31275-7
DOI: <http://dx.doi.org/10.1016/j.eurpolymj.2017.02.025>
Reference: EPJ 7727

To appear in: *European Polymer Journal*

Received Date: 11 October 2016
Revised Date: 29 December 2016
Accepted Date: 14 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Rapidly self-recoverable and fatigue-resistant hydrogels toughened
by chemical crosslinking and hydrophobic association**
