Synthesis, photophysical properties, and computational studies of four-coordinate copper(I) complexes based on benzimidazolylidene N-heterocyclic carbene (NHC) ligands bearing aryl substituents

Shengxian Xu, Jinglan Wang, Shaobo Liu, Feng Zhao, Hongying Xia, Yibo Wang

PII: S0022-2860(17)31328-5

DOI: [10.1016/j.molstruc.2017.09.119](https://doi.org/10.1016/j.molstruc.2017.09.119)

Reference: MOLSTR 24368

To appear in: *Journal of Molecular Structure*

Received Date: 20 June 2017

Revised Date: 27 September 2017

Accepted Date: 29 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
