Synthesis and characterization of a novel schiff base of 1,2-diaminopropane with substituted salicylaldehyde and its transition metal complexes: Single crystal structures and biological activities

Samina K. Tadavi, Abhijit A. Yadav, Ratnamala S. Bendre

PII: S0022-2860(17)31323-6

DOI: [10.1016/j.molstruc.2017.09.112](https://doi.org/10.1016/j.molstruc.2017.09.112)

Reference: MOLSTR 24361

To appear in: *Journal of Molecular Structure*

Received Date: 17 May 2017

Revised Date: 27 September 2017

Accepted Date: 27 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
