Spectral study of Rhodamine dyes in binary solutions

Andreea Celia Benchea, Daniela Babusca, Ana Cezarina Morosanu, Dan Gheorghe Dimitriu, Dana Ortansa Dorohoi

PII: S0022-2860(16)31410-7
DOI: 10.1016/j.molstruc.2016.12.091
Reference: MOLSTR 23289
To appear in: *Journal of Molecular Structure*
Received Date: 02 September 2016
Revised Date: 13 December 2016
Accepted Date: 28 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Binary solutions of two Rhodamine compounds were studied from solvatochromic point of view
- The dipole moments in the excited state were estimated for studied Rhodamines
- The contributions to the total spectral shifts of specific interactions were evaluated
