Spectroscopic and molecular docking studies on *N,N*-Di-*tert*-butoxycarbonyl (Boc)-2-amino pyridine: A potential bioactive agent for lung cancer treatment

R. Mohamed Asath, R. Premkumar, T. Mathavan, A. Milton Franklin Benial, Dr. Ph. D., Associate Professor

PII: S0022-2860(17)30569-0

DOI: [10.1016/j.molstruc.2017.04.117](https://doi.org/10.1016/j.molstruc.2017.04.117)

Reference: MOLSTR 23740

To appear in: *Journal of Molecular Structure*

Received Date: 29 January 2017

Revised Date: 29 April 2017

Accepted Date: 29 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The conformational energy profile of the N,N-Di-tert-butoxycarbonyl (Boc)-2-amino pyridine(DBAP) molecule

The lowest energy docked pose of the DBAP ligand with the epidermal growth factor receptor (EGFR) protein

The Raman spectra of the DBAP molecule
