Insight into the mechanism of action and selectivity of caspase-3 reversible inhibitors through *in silico* studies

Lucía Minini, Florencia Ferraro, Saira Cancela, Alicia Merlino

PII: S0022-2860(17)30898-0

DOI: [10.1016/j.molstruc.2017.06.118](https://doi.org/10.1016/j.molstruc.2017.06.118)

Reference: MOLSTR 24004

To appear in: *Journal of Molecular Structure*

Received Date: 2 February 2017

Revised Date: 23 June 2017

Accepted Date: 26 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Insights for developing
caspase-3 selective and
reversible inhibitors
