Synthesis, structural characterization and evaluation of catalytic and antimicrobial properties of new mononuclear Ag(I), Mn(II), Cu(II) and Pt(IV) complexes

Omyma A.M. Ali, Zeinab H. Abd El –Wahab, Basmh A. Ismail

PII: S0022-2860(17)30286-7

DOI: [10.1016/j.molstruc.2017.03.025](https://doi.org/10.1016/j.molstruc.2017.03.025)

Reference: MOLSTR 23521

To appear in: *Journal of Molecular Structure*

Received Date: 21 January 2017

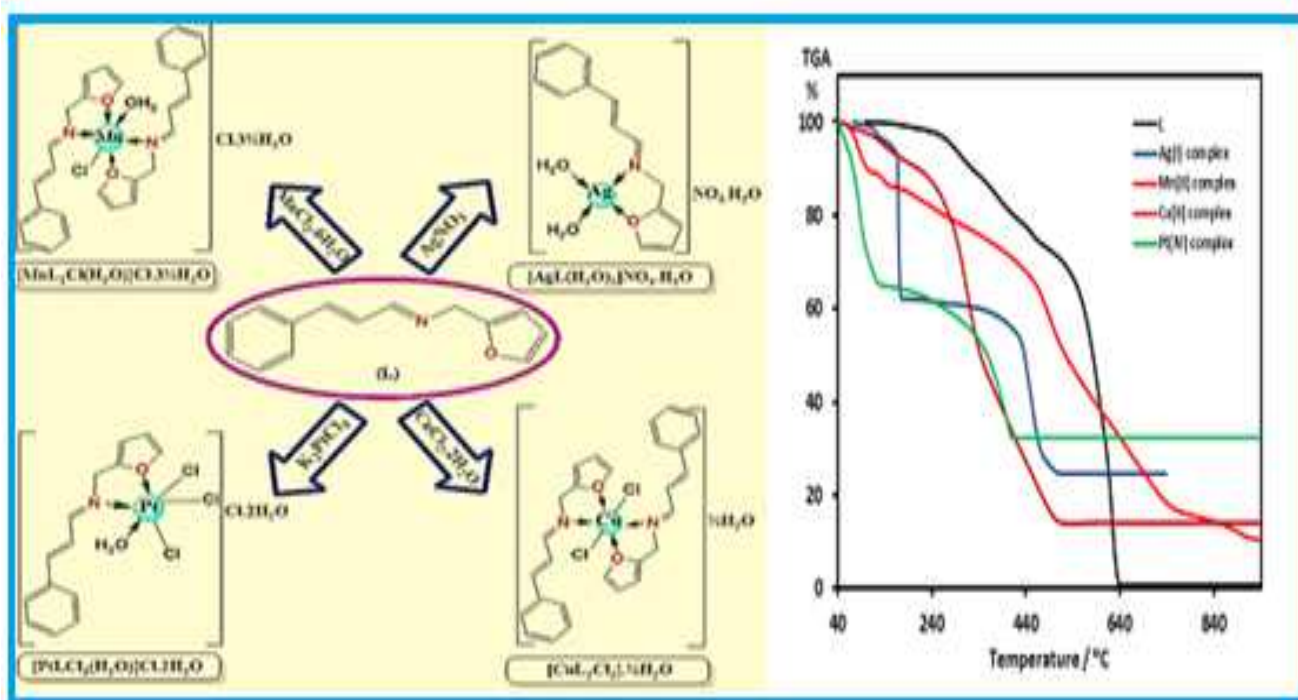

Revised Date: 1 March 2017

Accepted Date: 6 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical abstract

Thermal analysis study for the synthesized metal complexes in comparison to their parent ligand
