

Polymer Vol 117, 19 May 2017

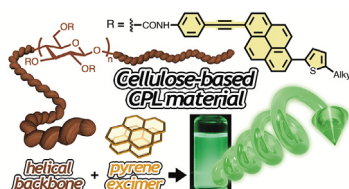

Graphical abstracts

POLYMER COMMUNICATIONS

Cellulose derivatives bearing pyrene-based π -conjugated pendants with circularly polarized luminescence in molecularly dispersed state

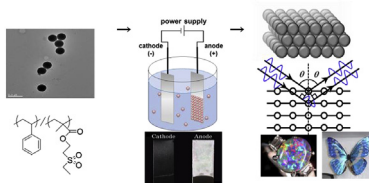

pp. 220–224

Tomoyuki Ikai*, Yutaka Kojima, Ken-ichi Shinohara, Katsuhiko Maeda and Shigeyoshi Kanoh

**Electrophoretic non-ionic nano-spheres (latexes) for structural coloring**

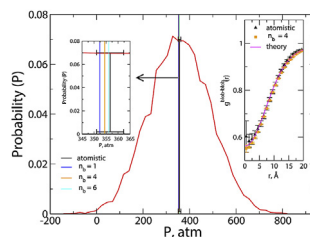

pp. 243–248

Daiki Mokude, Akinori Takasu* and Masahiro Higuchi

**Thermodynamic consistency in the structure-based integral equation coarse-grained method**

pp. 282–286

M. Dinpajooh and M.G. Guenza*

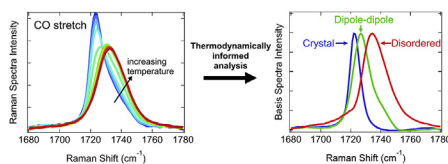

POLYMER PAPERS

Determining conformational order and crystallinity in polycaprolactone via Raman spectroscopy

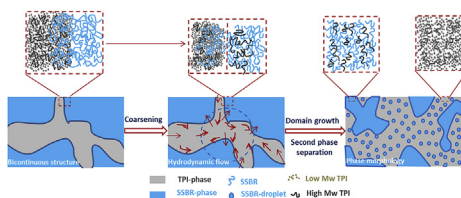

pp. 1–10

Anthony P. Kotula*, Chad R. Snyder and Kalman B. Migler

**Morphology evolution in solution polymerized styrene-butadiene rubber (SSBR) / *trans*-1,4-polyisoprene (TPI) blends: SSBR particle formation, TPI crystal nucleation, growth and polymorphic form**

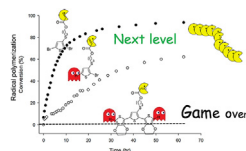

pp. 11–16

Huarong Nie, Dandan Liu, Chenguang Liu, Xiaojian Wang and Aihua He*

**Electroactive polyacrylates bearing linear conjugated systems based on EDOT moieties**

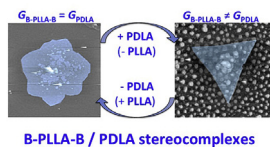

pp. 17–24

Djibril Faye, The Hy Duong, Inmaculada Vieitez, Frédéric Gohier*, Hugues Brisset, Pierre Frère, Jean-François Briand, Philippe Leriche and Christine Bressy**

**Crystallization and morphology of ultrathin films of poly(*d*-lactide) with BAB block copolymers in which the A block is made of poly(*l*-lactide)**

pp. 25–29

Nguyen-Dung Tien and Robert E. Prud'homme*
