Chain-growth condensation polymerization of 5-aminoisophthalic acid triethylene glycol ester to afford well-defined, water-soluble, thermoresponsive hyperbranched polyamides

Yoshihiro Ohta, Kento Sakurai, Jun Matsuda, Tsutomu Yokozawa

PII: S0032-3861(16)30745-5

DOI: [10.1016/j.polymer.2016.08.079](https://doi.org/10.1016/j.polymer.2016.08.079)

Reference: JPOL 18976

To appear in: *Polymer*

Received Date: 19 June 2016

Revised Date: 22 August 2016

Accepted Date: 24 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Chain-growth condensation polymerization of 5-aminoisophthalic acid triethylene glycol ester to afford well-defined, water-soluble, thermoresponsive hyperbranched polyamides

Yoshihiro Ohta, Kento Sakurai, Jun Matsuda, and Tsutomu Yokozawa\*
