Effect of well-dispersed surface-modified silica nanoparticles on crystallization behavior of poly (lactic acid) under compressed carbon dioxide

K. Sarikhani, R. Nasser, V. Lotocki, R.B. Thompson, C.B. Park, P. Chen

PII: S0032-3861(16)30494-3

DOI: [10.1016/j.polymer.2016.06.019](https://doi.org/10.1016/j.polymer.2016.06.019)

Reference: JPOL 18756

To appear in: *Polymer*

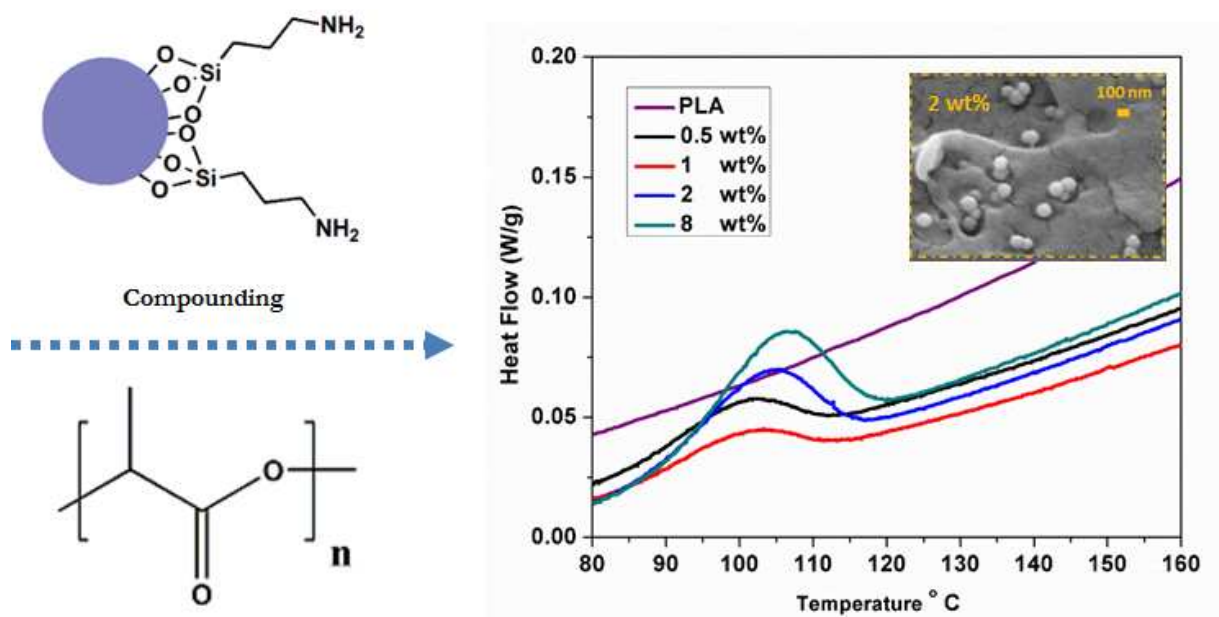

Received Date: 23 February 2016

Revised Date: 29 May 2016

Accepted Date: 7 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
