

Polymer Vol 70, 23 July 2015

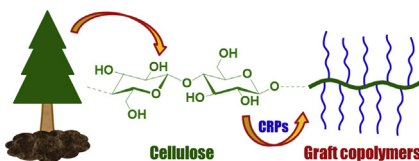

Graphical abstracts

FEATURE ARTICLES

Graft modification of cellulose: Methods, properties and applications

pp. A1–16

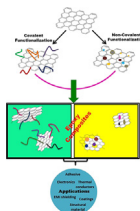

Hongliang Kang, Ruigang Liu* and Yong Huang*

Tailoring the interface in graphene/thermoset polymer composites: A critical review

pp. A17–A34

Rani Rohini, Prajakta Katti and Suryasarathi Bose*

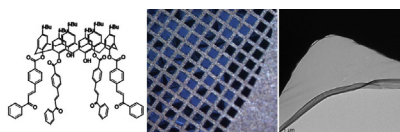

POLYMER PAPERS

Compounds bearing multiple photoreactive chalcone units: Synthesis and study towards 2D polymerization in Langmuir monolayers

pp. 1–7

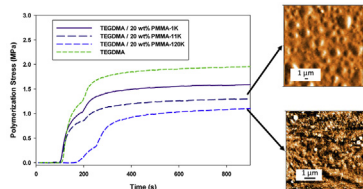

Jeroen van Heijst, Mirza Corda and Oleg Lukin*

Modification of linear prepolymers to tailor heterogeneous network formation through photo-initiated polymerization-induced phase separation

pp. 8–18

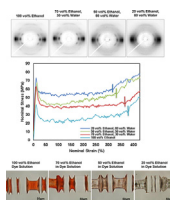

Caroline R. Szczepanski and Jeffrey W. Stansbury*

Role of ethanol concentration on drawing and infusibility behavior of poly(ethylene terephthalate) filaments upon cold drawing

pp. 19–29

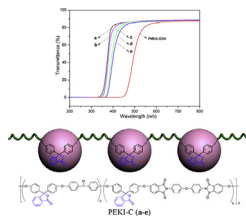

Rina Khanum, Dong Woo Go, Wataru Takarada, Arun Aneja and Takeshi Kikutani*

Synthesis of high performance phenolphthalein-based cardo poly(ether ketone imide)s via aromatic nucleophilic substitution polymerization

pp. 30–37

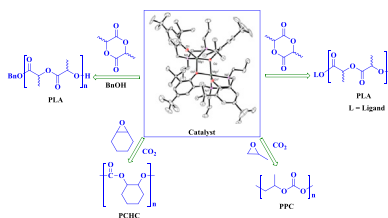

Jiangtao Liu, Guofei Chen*, Junchao Guo, Nafeesa Mushtaq and Xingzhong Fang*

Magnesium complexes of the N, O polydentate scaffold: Synthesis, structural characterization and polymerization studies

pp. 38–51

Swarup Ghosh, P.K.S. Antharjanam and Debashis Chakraborty*
