Degradation of different elastomeric polymers in simulated geothermal environments at 300°C

Toshifumi Sugama, Tatiana Pyatina, Erica Redline, James McElhanon, Douglas Blankenship

PII: S0141-3910(15)30041-0

DOI: [10.1016/j.polymdegradstab.2015.07.010](https://doi.org/10.1016/j.polymdegradstab.2015.07.010)

Reference: PDST 7698

To appear in: *Polymer Degradation and Stability*

Received Date: 20 March 2015

Revised Date: 4 June 2015

Accepted Date: 13 July 2015

Please cite this article as: Sugama T, Pyatina T, Redline E, McElhanon J, Blankenship D, Degradation of different elastomeric polymers in simulated geothermal environments at 300°C, *Polymer Degradation and Stability* (2015), doi: 10.1016/j.polymdegradstab.2015.07.010.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Degradation of different elastomeric polymers in simulated geothermal environments at 300°C
