Effects of the Reduction of PAni-coated Oxidized Multiwall Carbon Nanotubes on the Positive Temperature Coefficient Behaviors of Their Carbon Black/High Density Polyethylene Composites

Seon Hyeong Bae, Rama K. Layek, Seung Hee Lee, Tapas Kuila, Nam Hoon Kim, Joong Hee Lee

PII: S0142-9418(15)30240-3

DOI: [10.1016/j.polymertesting.2016.01.001](https://doi.org/10.1016/j.polymertesting.2016.01.001)

Reference: POTE 4552

To appear in: *Polymer Testing*

Received Date: 30 November 2015

Accepted Date: 5 January 2016

Lee, Effects of the Reduction of PAni-coated Oxidized Multiwall Carbon Nanotubes on the Positive Temperature Coefficient Behaviors of Their Carbon Black/High Density Polyethylene Composites, *Polymer Testing* (2016), doi: 10.1016/j.polymertesting.2016.01.001.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
