Manipulation of mechanical properties of short pineapple leaf fiber reinforced natural rubber composites through variations in cross-link density and carbon black loading

Pitchapa Pittayavinai, Sombat Thanawan, Taweechai Amornsakchai

PII: S0142-9418(16)30500-1

DOI: [10.1016/j.polymertesting.2016.07.002](https://doi.org/10.1016/j.polymertesting.2016.07.002)

Reference: POTE 4702

To appear in: *Polymer Testing*

Received Date: 26 May 2016

Accepted Date: 2 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Material Properties

**Manipulation of mechanical properties of short pineapple leaf fiber reinforced natural rubber composites through variations in cross-link density and carbon black loading**
