

Accepted Manuscript

Simultaneous improvement in the strength and toughness of polypropylene by incorporating hybrid Graphene/CaCO₃ reinforcement

Saman Menbari, Faramarz Ashenai Ghasemi, Ismail Ghasemi

PII: S0142-9418(16)30604-3

DOI: [10.1016/j.polymertesting.2016.07.026](https://doi.org/10.1016/j.polymertesting.2016.07.026)

Reference: POTE 4726

To appear in: *Polymer Testing*

Received Date: 23 June 2016

Accepted Date: 28 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Material Properties

Simultaneous improvement in the strength and toughness of polypropylene
by incorporating hybrid Graphene/CaCO₃ reinforcement
