

Accepted Manuscript

Aromatization of pyridinylidenes into pyridines is inhibited by exocyclic delocalization.
A theoretical mechanistic assessment

Guillermo Caballero-García, Marisol Reyes-Lezama, Diego Martínez-Otero, Moisés Romero-Ortega, Joaquín Barroso-Flores

PII: S0040-4020(16)30475-6

DOI: [10.1016/j.tet.2016.05.058](https://doi.org/10.1016/j.tet.2016.05.058)

Reference: TET 27785

To appear in: *Tetrahedron*

Received Date: 5 January 2016

Revised Date: 19 May 2016

Accepted Date: 20 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

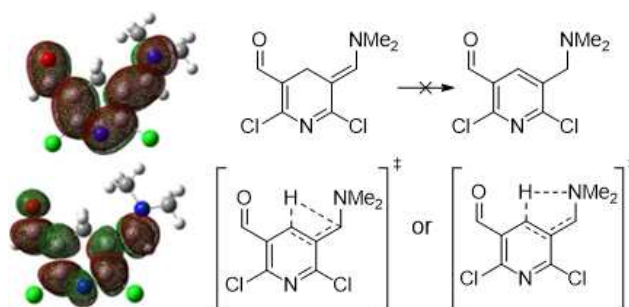

Graphical Abstract

To create your abstract, type over the instructions in the template box below.
 Fonts or abstract dimensions should not be changed or altered.

**Aromatization of Pyridinylidenes into
 Pyridines is Inhibited by Exocyclic
 Delocalization. A Theoretical Mechanistic
 Assessment**

Leave this area blank for abstract info.
