

Accepted Manuscript

A highly selective and sensitive 3-hydroxyflavone-based colorimetric and fluorescent probe for hydrogen sulfide with a large Stokes shift

Peng Hou, Hongmei Li, Song Chen

PII: S0040-4020(16)30368-4

DOI: [10.1016/j.tet.2016.04.079](https://doi.org/10.1016/j.tet.2016.04.079)

Reference: TET 27722

To appear in: *Tetrahedron*

Received Date: 15 March 2016

Revised Date: 26 April 2016

Accepted Date: 29 April 2016

Please cite this article as: Hou P, Li H, Chen S, A highly selective and sensitive 3-hydroxyflavone-based colorimetric and fluorescent probe for hydrogen sulfide with a large Stokes shift, *Tetrahedron* (2016), doi: 10.1016/j.tet.2016.04.079.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graph Abstract

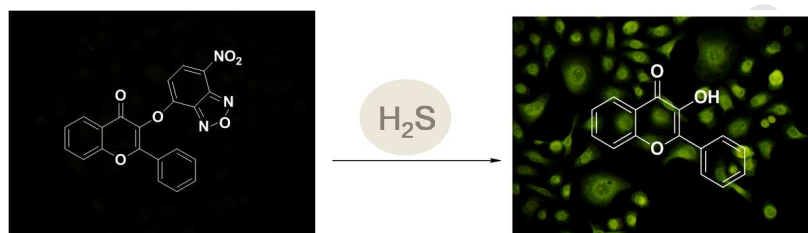

To create your abstract, type over the instructions in the template box below.

A highly selective and sensitive 3-hydroxyflavone-based colorimetric and fluorescent probe for hydrogen sulfide with a large Stokes shift

Peng Hou,* Hongmei Li and Song Chen

College of Pharmacy, Qiqihar Medical University, Qiqihar, Heilongjiang Province, P. R. China, 161006.
