Contents

REPORT

Recent advances in the C–H-functionalization of the distal positions in pyridines and quinolines

pp 8683–8716

David E. Stephens, Oleg V. Larionov*

ARTICLES

Two sensors based on π -extended TTF: synthesis and high selectivity for copper(II)

pp 8717–8724

Yuwen Ma, Guoqiao Lai, Zhifang Li, Wenbin Tan, Yongjia Shen, Chengyun Wang*

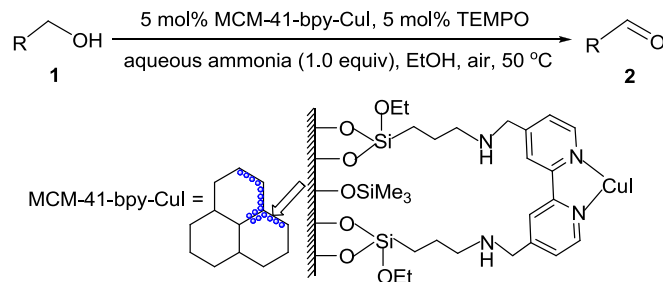

Two exTTF-based optical and electrochemical sensors for selective and sensitive detection of copper(II) were prepared. Their solution color changed obviously from yellow to orange and cyclic voltammograms changed dramatically.

A highly efficient heterogeneous aerobic alcohol oxidation catalyzed by immobilization of bipyridine copper(I) complex in MCM-41

pp 8725–8731

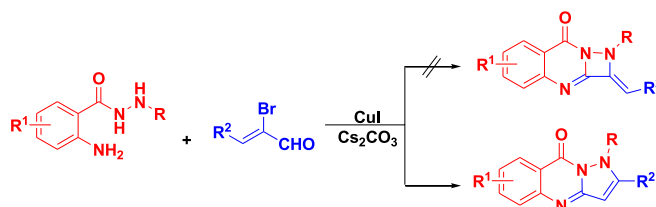

Hong Zhao, Qirong Chen, Li Wei, Yuanyuan Jiang, Mingzhong Cai*

Domino synthesis of fused pyrazolo[5,1-*b*]quinazolin-9(1*H*)-ones catalyzed by CuI via subsequent Michael addition and elimination

pp 8732–8737

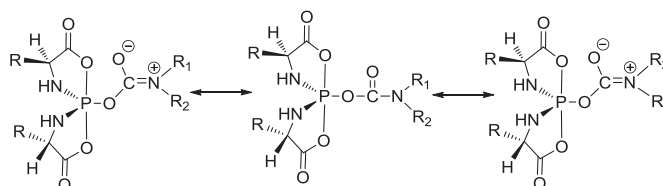

Yan Zhang, Jing Xu, Chao Li, Xiang-Shan Wang*

Investigation of the C–N bond rotation of spirophosphorane carbamates by dynamic NMR and DFT calculation

pp 8738–8745

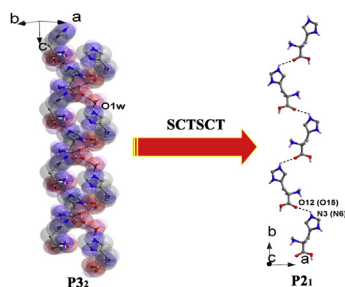

Pei Zhao, Shuxia Cao*, Yanchun Guo, Peng Gao, Yanyan Wang, Miaomiao Peng, Yufen Zhao

Chiral supramolecular compounds comprising naphthalene-1,5-disulfonic acid and various α -amino acids: influence of substituents of α -amino acids on the structures, circular dichroism and luminescent properties

pp 8746–8757

Ya-Nan Li, Li-Hua Huo, Xin Zou, Zhao-Peng Deng*, Zhi-Biao Zhu, Shan Gao*
