Tetrahedron Symposia-in-Print

Special Memorial Issue for Professor Alan Katritzky

Alan Roy Katritzky (1928–2014): an appreciation

pp 7097–7100

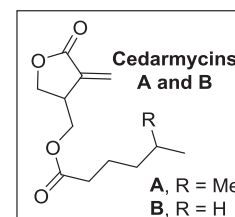

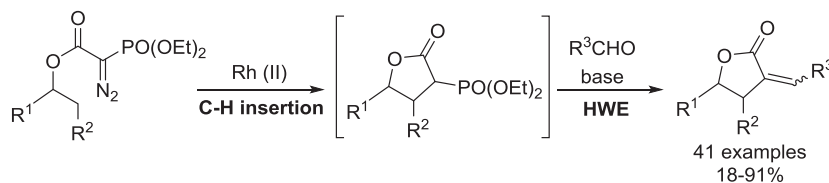

p 7101

pp 7102–7106

α -Alkylidene- γ -butyrolactone synthesis via one-pot C–H insertion/olefination: substrate scope and the total synthesis of (\pm)-cedarmycins A and B

pp 7107–7123

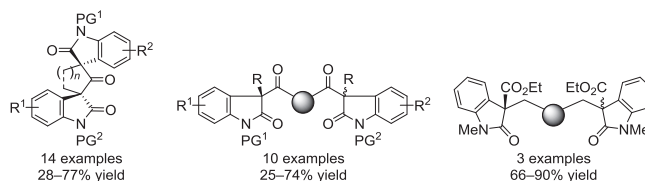

Matthew G. Lloyd, Mariantonietta D'Acunto, Richard J.K. Taylor*, William P. Unsworth*

Substrate scope in the copper-mediated construction of bis-oxindoles via a double C–H/Ar–H coupling process

pp 7124–7136

Pauline Drouhin, Timothy E. Hurst, Adrian C. Whitwood, Richard J.K. Taylor*

- one-pot double cyclisation
- central core easily varied

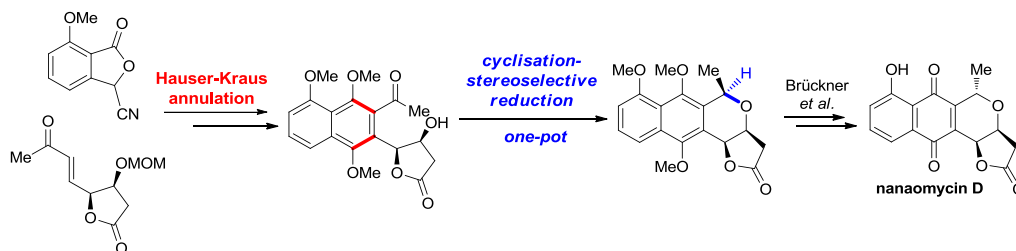

- inexpensive copper catalyst
- reactions run open to air

Formal synthesis of nanaomycin D via a Hauser–Kraus annulation using a chiral enone–lactone

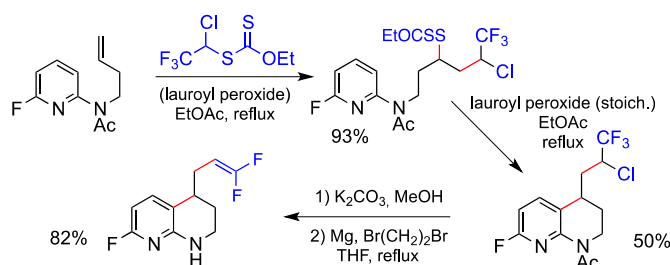

pp 7137–7143

Najmah P.S. Hassan, Briar J. Naysmith, Jonathan Sperry, Margaret A. Brimble*

**A convergent, modular access to α -chloro-trifluoromethyl derivatives and to 1,1-difluoroalkenes**

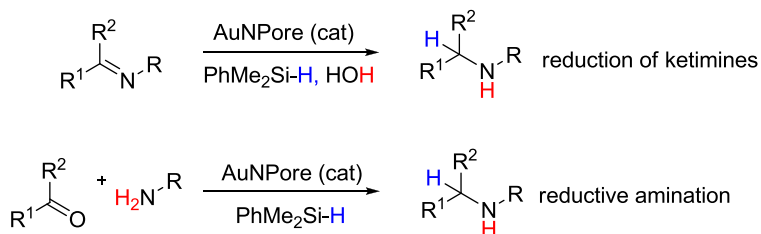

pp 7144–7153

Pierre Salomon, Wioletta Kosnik, Samir Z. Zard*

**Highly chemoselective reduction of imines using a AuNPore/PhMe₂SiH/water system and its application to reductive amination**

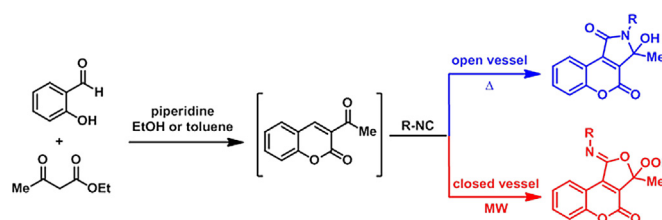

pp 7154–7158

Balaram S. Takale, Shanmou Tao, Xiaoqiang Yu, Xiujuan Feng, Tienan Jin, Ming Bao*, Yoshinori Yamamoto*

**A detailed investigation of the multicomponent reaction of salicylaldehyde, ethyl acetoacetate and isocyanides under microwave heating**

pp 7159–7169

Tayebeh Amanpour, Klaus Zangger, Ferdinand Belaj, Ayoob Bazgir, Doris Dallinger*, C. Oliver Kappe
