Neuro-peptide treatment with Cerebrolysin improves the survival of Neural Stem Cell grafts in an APP transgenic model of Alzheimer Disease

Edward Rockenstein, Paula Desplats, Kiren Ubhi, Michael Mante, Jazmin Florio, Anthony Adame, Stefan Winter, Hemma Brandstaetter, Dieter Meier, Eliezer Masliah

PII: S1873-5061(15)00050-1
DOI: doi: [10.1016/j.scr.2015.04.008](https://doi.org/10.1016/j.scr.2015.04.008)
Reference: SCR 522

To appear in: *Stem Cell Research*

Received date: 23 December 2014
Revised date: 31 March 2015
Accepted date: 30 April 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Neuro-peptide treatment with Cerebrolysin improves the survival of Neural Stem Cell grafts in an APP transgenic model of Alzheimer Disease
