

Tetrahedron Vol. 70, Issue 27–28, 2014

Tetrahedron Symposia-in-Print Number 167

Tetrahedron Young Investigator Award 2014
A divergent strategy enables the synthesis of three architecturally
distinct *ent*-kauranoids from γ -cyclogeraniol
Sarah E. Reisman

Guest editor: Stephen F. Martin

*The Department of Chemistry, The University of Texas at Austin, 1 University Station A5300,
 Austin, TX 78712, USA*

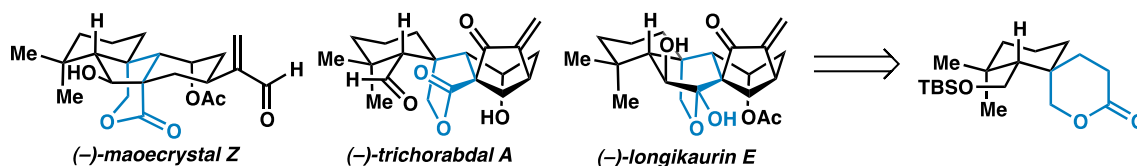

Contents

Tetrahedron Symposia-in-Print
 Tetrahedron Young Investigator Award 2014

pp 4065–4068
 p 4069

A unified strategy for the synthesis of (–)-maoecrystal Z, (–)-trichorabdal A, and (–)-longikaurin E
 John T.S. Yeoman, Jacob Y. Cha, Victor W. Mak, Sarah E. Reisman*

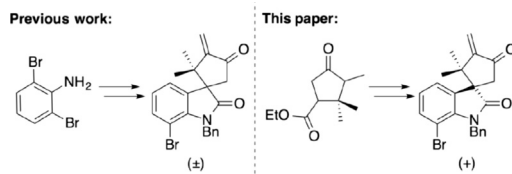

pp 4070–4088

Synthetic studies toward the citrinadins: enantioselective preparation of an advanced spirooxindole intermediate

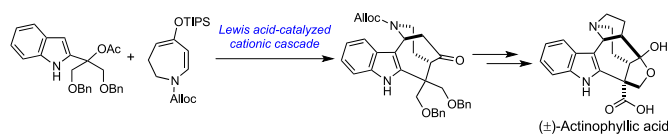

pp 4089–4093

Takanori Matsumaru, Monica E. McCallum, John A. Enquist, Jr., Genessa M. Smith, Ke Kong, John L. Wood*

**Concise total synthesis of (±)-actinophyllic acid**

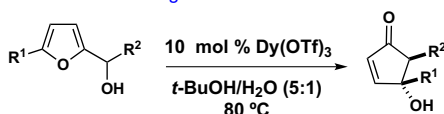

pp 4094–4104

Brett A. Granger, Ivan T. Jewett, Jeffrey D. Butler, Stephen F. Martin*

**Efficient synthesis of 4-hydroxycyclopentenones: dysprosium(III) triflate catalyzed Piancatelli rearrangement**

pp 4105–4110

David Fisher, Leoni I. Palmer, Jonathan E. Cook, Jessica E. Davis, Javier Read de Alaniz*

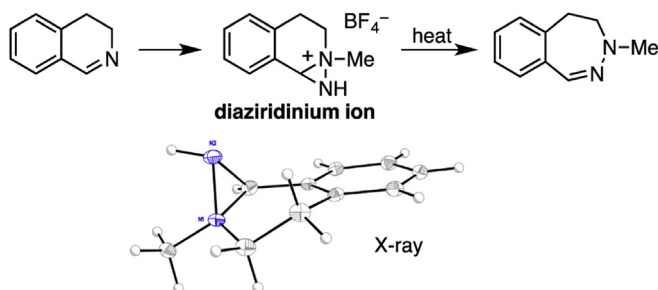

Piancatelli Rearrangement

- catalytic
- mild
- moisture and air insensitive
- direct access to valuable synthetic building blocks

Synthesis and characterization of a diaziridinium ion. Conversion of 3,4-dihydroisoquinolines to 4,5-dihydro-3H-benzo [2,3]diazepines via a formal N-insertion process

pp 4111–4117

Julia M. Allen, Tristan H. Lambert*
