Designing a Next Generation of Proton Sponges: Cyclopropeniminophosphazenes as the strongest pincer ligands

Danijela Barić, Borislav Kovačević

PII: S0040-4039(15)30469-X

DOI: <http://dx.doi.org/10.1016/j.tetlet.2015.12.054>

Reference: TETL 47101

To appear in: *Tetrahedron Letters*

Received Date: 2 November 2015

Revised Date: 6 December 2015

Accepted Date: 9 December 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Designing a Next Generation of Proton Sponges:
Cyclopropeniminophosphazenes as the strongest pincer ligands**
