

## Accepted Manuscript

Syntheses of Nucleosides with a 1',2'- $\beta$ -Lactam Moiety as Potential Inhibitors of Hepatitis C Virus NS5B Polymerase

Qun Dang, Zhibo Zhang, Yunfeng Bai, Ruijun Sun, Jie Yin, Tongqian Chen, Stephane Bogen, Vinay Girijavallabhan, David B. Olsen, Peter T. Meinke

PII: S0040-4039(14)01415-4  
DOI: <http://dx.doi.org/10.1016/j.tetlet.2014.08.072>  
Reference: TETL 45039

To appear in: *Tetrahedron Letters*

Received Date: 29 July 2014  
Revised Date: 14 August 2014  
Accepted Date: 18 August 2014

Please cite this article as: Dang, Q., Zhang, Z., Bai, Y., Sun, R., Yin, J., Chen, T., Bogen, S., Girijavallabhan, V., Olsen, D.B., Meinke, P.T., Syntheses of Nucleosides with a 1',2'- $\beta$ -Lactam Moiety as Potential Inhibitors of Hepatitis C Virus NS5B Polymerase, *Tetrahedron Letters* (2014), doi: <http://dx.doi.org/10.1016/j.tetlet.2014.08.072>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Graphical Abstract**

To create your abstract, type over the instructions in the template box below.  
Fonts or abstract dimensions should not be changed or altered

**Syntheses of Nucleosides with a 1',2'- $\beta$ -Lactam Moiety as Potential Inhibitors of Hepatitis C Virus NS5B Polymerase**

Leave this area blank for abstract info.
