

## Accepted Manuscript

An efficient synthesis of benzodiazepine derivatives via a one-pot, three-component reaction accelerated by a chitosan-supported superparamagnetic iron oxide nanocomposite

Ali Maleki, Maryam Kamalzare

PII: S0040-4039(14)01826-7  
DOI: <http://dx.doi.org/10.1016/j.tetlet.2014.10.120>  
Reference: TETL 45349

To appear in: *Tetrahedron Letters*

Received Date: 23 August 2014  
Revised Date: 15 October 2014  
Accepted Date: 22 October 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphical Abstract

An efficient synthesis of benzodiazepine derivatives via a one-pot, three-component reaction accelerated by a chitosan-supported superparamagnetic iron oxide nanocomposite

Ali Maleki, Maryam Kamalzare
