Contents

COMMUNICATIONS

Rhodium catalyzed hydroformylation with formaldehyde and an external H₂-source

pp 2209–2211

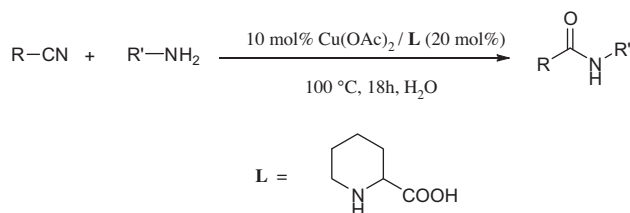

Marcus Uhlemann, Stephan Doerfelt, Armin Börner*

An efficient protocol for the preparation of amides by copper-catalyzed reactions between nitriles and amines in water

pp 2212–2216

Xiaoya Li, Zhengkai Li, Hang Deng, Xiangge Zhou*

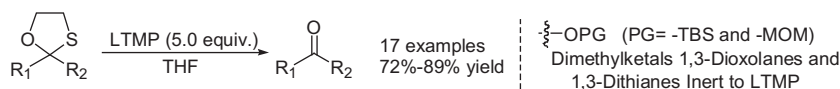

41 examples with yields up to 90%

Deprotection of 1,3-oxathiolanes to ketones promoted by base

pp 2217–2220

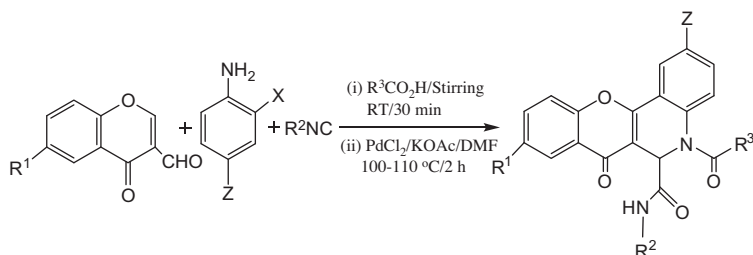

Biao Du, Changchun Yuan, Langzhong Zhang, Li Yang, Bo Liu*

Ligand-free palladium-catalyzed intramolecular arylation of chromones: an expedient synthesis of 1-benzopyrano[3,2-c]quinolines

pp 2221–2225

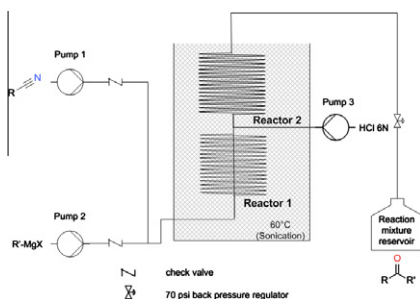

Jaydip Ghosh, Pritam Biswas, Sourav Maiti, Tapas Sarkar, Michael G. B. Drew, Chandrakanta Bandyopadhyay*

Efficient and scalable synthesis of ketones via nucleophilic Grignard addition to nitriles using continuous flow chemistry

pp 2226–2230

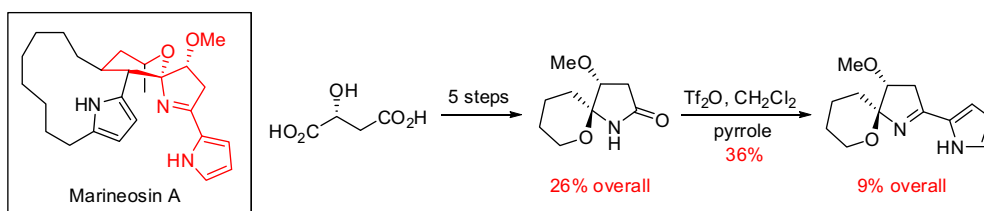

Carlos Mateos*, Juan A. Rincón, José Villanueva

Spiroaminal model systems of the marineosins with final step pyrrole incorporation

pp 2231–2234

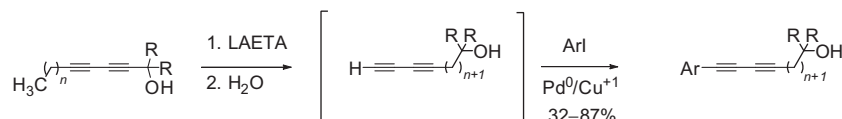

Joseph D. Panarese, Leah C. Konkol, Cynthia B. Berry, Brittney S. Bates, Leslie N. Aldrich, Craig W. Lindsley*

An acetylene zipper–Sonogashira reaction sequence for the efficient synthesis of conjugated arylalkadiynols

pp 2235–2238

Alexandra E. Kulyashova, Viktor N. Sorokoumov, Vladimir V. Popik, Irina A. Balova*
