This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **ACCEPTED MANUSCRIPT**

### **Graphical Abstract**

#### A fluorescent probe emitting in nearinfrared region for sensitive and selective detection of biothiols in both solution and living cells

Wenqiang Chen<sup>a, b</sup>, Hongchen Luo<sup>a</sup>, Xingjiang Liu<sup>a</sup>, Fengpei Qi<sup>a</sup>, Dalei Yang<sup>a</sup> and Xiangzhi Song<sup>a, c, d</sup>\*

- \* Remarkable NIR fluorescence enhancement
- ★ High sensitivity and good selectivity
- ★ Capable of imaging biothiols in living cells
