

## Accepted Manuscript

Title: Flame-retardant carbon nanotube films

Author: Dawid Janas Monika Rdest Krzysztof K.K. Koziol

PII: S0169-4332(17)30822-X

DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2017.03.144>

Reference: APSUSC 35520

To appear in: *APSUSC*

Received date: 8-9-2016

Revised date: 22-2-2017

Accepted date: 16-3-2017

Please cite this article as: D. Janas, M. Rdest, K.K.K. Koziol, Flame-retardant carbon nanotube films, *Applied Surface Science* (2017), <http://dx.doi.org/10.1016/j.apsusc.2017.03.144>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights:**

- ▶ Free-standing carbon nanotube films showed excellent fire-retardancy properties
- ▶ They outperformed leading materials currently available on the market
- ▶ We envision them as a key part of new generation of fire-resistant garments
